SUBJECT INDEX

Accuracy
  Accurate measurement of Mg and Al K$\alpha_{1,2}$ X-ray energy profiles 463
AES
  Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
Algorithm
  The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
Alignment
  Alignment of $Kr^+(3d_{3/2,5/2})$ and $Xe^+(4d_{3/2,5/2})$ after proton impact ionization in the energy range 40–300 keV 289
Alignment parameter
  Alignment of $Kr^+(3d_{3/2,5/2})$ and $Xe^+(4d_{3/2,5/2})$ after proton impact ionization in the energy range 40–300 keV 289
Anisotropy
  Photoexcited *K* Auger spectra of atomic and molecular oxygen 243
Antiaromatic
  He I photoelectron spectra and π-electronic structure of 1,3,2,4-benzodithiadiazine and 5,6,7,8-tetrafluoro-1,3,2,4-benzodithiadiazine, formally antiaromatic 12π-electron compounds 489
AREELS
  An angular resolved electron energy loss investigation of highly oriented pyrolitic graphite electronic structure 479
Argon
  Electron impact multiple ionization cross section of argon (σ_{n+}, $n = 3$–6) 503
Aryleneazachalcogenene
  He I photoelectron spectra and π-electronic structure of 1,3,2,4-benzodithiadiazine and 5,6,7,8-tetrafluoro-1,3,2,4-benzodithiadiazine, formally antiaromatic 12π-electron compounds 489
Atom
  Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Auger
  Accurate measurement of Mg and Al K$\alpha_{1,2}$ X-ray energy profiles 463
  Alignment of $Kr^+(3d_{3/2,5/2})$ and $Xe^+(4d_{3/2,5/2})$ after proton impact ionization in the energy range 40–300 keV 289
  Angular distribution of photon-induced $M_{2,3}$–N_1N_1 Auger electrons in atomic calcium 363
  Auger electron–photoion coincidence measurements of atoms and molecules using X-ray synchrotron radiation 373
  Auger spectroscopy at low kinetic energies 341
  Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261
  Deexcitation spectroscopy of core-excited methyl formate 233
  Influence of core hole screening on molecular Auger rates and inner-shell lifetimes 159
  New directions in the study of atomic autoionizing states 223
  Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
  Photoexcited *K* Auger spectra of atomic and molecular oxygen 243
  The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141
  The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 275
  The importance of ligand-field splitting in the interpretation of the HBr Br3d pre-edge photoabsorption (EELS) spectrum, the Br3d photoelectron spectrum, and the *MVV* Auger spectrum 299
  Yields, sensitivities and natural line shapes of high-energy Auger lines: Ta, W, Pt, Au, Pb and Bi 511
  Zero-degree Auger spectroscopy in energetic, highly charged ion–atom collisions 309
Autoionization
  New directions in the study of atomic autoionizing states 233
Autoionizing state
  New directions in the study of atomic autoionizing states 223

AWDS
Surface vibrations of silicon nitride: inelastic neutron scattering study and computer modeling 133

Bibliography
Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Binding energy
VUV light-induced electron emission from organic liquids 417
Boron trifluoride
The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 275

Caesium
The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141
Calcium
Angular distribution of photon-induced $M_{2,3}$–N_1N_1 Auger electrons in atomic calcium 363
Carbon monoxide
Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261
CI
The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141
Theory assisted interpretation of copper phthalocyanine core levels XPS spectra 189
Coherent excitation
Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261
Coincidence
New directions in the study of atomic autoionizing states 233
Conjugation
He I photoelectron spectroscopic studies of the electronic structure in some forked conjugated systems. Experimental and theoretical studies of the molecular orbital character of the compounds 493
Copper phthalocyanine
Theory assisted interpretation of copper phthalocyanine core levels XPS spectra 189
Core hole
Influence of core hole screening on molecular Auger rates and inner-shell lifetimes 159
Core hole screening
Influence of core hole screening on molecular Auger rates and inner-shell lifetimes 159
Cyanide
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
Cyclic aryleneazachalcogenene
He I photoelectron spectra and π-electronic structure of 1,3,2,4-benzodithiadiazine and 5,6,7,8-tetrafluoro-1,3,2,4-benzodithiadiazine, formally antiaromatic 12π-electron compounds 489

Database
Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Deexcitation spectroscopy
Deexcitation spectroscopy of core-excited methyl formate 233
Depth profile
The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
Diatomic molecule
Auger spectroscopy at low kinetic energies 341
Dichroism
X-ray absorption and dichroism of transition metals and their compounds 529
Dysprosium
Experimental estimate of absorption length and total electron yield (TEY) probing depth in dysprosium 181

EELS
The importance of ligand-field splitting in the interpretation of the HBr Br3d pre-edge photoabsorption (EELS) spectrum, the Br3d photoelectron spectrum, and the *MVV* Auger spectrum 299
Efficiency
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
ELETTRA
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
Entropy
The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
Equipment
Auger electron–photoion coincidence measurements of atoms and molecules using X-ray synchrotron radiation 373
Ethenethiol
Ethenethiol and 1-propene-1-thiol: a photoelectron spectroscopic study 173
eeE
Zero-degree Auger spectroscopy in energetic, highly charged ion–atom collisions 309

Franck–Codon
Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261

Gas phase
Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Graphite
An angular resolved electron energy loss investigation of highly oriented pyrolitic graphite electronic structure 479

HDA
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
HOMO
He I photoelectron spectroscopic studies of the electronic structure in some forked conjugated systems. Experimental and theoretical studies of the molecular orbital character of the compounds 493
HOPG
An angular resolved electron energy loss investigation of highly oriented pyrolitic graphite electronic structure 479
Hydride
Influence of core hole screening on molecular Auger rates and inner-shell lifetimes 159
Hydrogen bromide
The importance of ligand-field splitting in the interpretation of the HBr Br3d pre-edge photoabsorption (EELS) spectrum, the Br3d photoelectron spectrum, and the *MVV* Auger spectrum 299

Improvement
XPS determination of the isoelectric point of solid surfaces: possible improvements to the method of Simmons and Beard R1
INS
Surface vibrations of silicon nitride: inelastic neutron scattering study and computer modeling 133
Inner shell
Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Influence of core hole screening on molecular Auger rates and inner-shell lifetimes 159
Instrument
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
Intensity ratio
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429
Interface
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
VUV light-induced electron emission from organic liquids 417
Ionization cross section
Electron impact multiple ionization cross section of argon (σ_{n+}, $n = 3$–6) 503
Isoelectric point
XPS determination of the isoelectronic point of solid surfaces: possible improvements to the method of Simmons and Beard R1

Ketone
He I photoelectron spectroscopic studies of the electronic structure in some forked conjugated systems. Experimental and theoretical studies of the molecular orbital character of the compounds 493
Kinematic effect
Zero-degree Auger spectroscopy in energetic, highly charged ion–atom collisions 309
Kinematics
An angular resolved electron energy loss investigation of highly oriented pyrolitic graphite electronic structure 479
Kinetics
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
Kramers–Krönig
On the deposition of thin TiO_2 films from Langmuir Blodgett film precursors. An electron spectroscopy study 163

Langmuir Blodgett film
On the deposition of thin TiO_2 films from Langmuir Blodgett film precursors. An electron spectroscopy study 163
Ligand-field splitting
The importance of ligand-field splitting in the interpretation of the HBr Br3d pre-edge photoabsorption (EELS) spectrum, the Br3d photoelectron spectrum, and the *MVV* Auger spectrum 299
Low kinetic energy
Auger spectroscopy at low kinetic energies 341

Maximum entropy
The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
MCSCF
Theory assisted interpretation of copper phthalocyanine core levels XPS spectra 189

Methyl formate
Deexcitation spectroscopy of core-excited methyl formate 233
Minimum χ^2
The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
Mixed salt
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
MNDO
He I photoelectron spectroscopic studies of the electronic structure in some forked conjugated systems. Experimental and theoretical studies of the molecular orbital character of the compounds 493
MOS
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
Model
Accurate measurement of Mg and Al $K\alpha_{1,2}$ X-ray energy profiles 463
Surface vibrations of silicon nitride: inelastic neutron scattering study and computer modeling 133
X-ray absorption and dichroism of transition metals and their compounds 529
Molecule
Bibliography and database of inner shell excitation spectra of gas phase atoms and molecules 1
Morphology
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429
Multichannel
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
Multiple ionization
Electron impact multiple ionization cross section of argon (σ_{n+}, $n = 3$–6) 503

Neon
Auger spectroscopy at low kinetic energies 341
Photoexcited *K* Auger spectra of atomic and molecular oxygen 243
NICS
Electron impact multiple ionization cross section of argon (σ_{n+}, $n = 3$–6) 503
Nitridation
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
Nitrogen
Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261

Open shell
Photoexcited *K* Auger spectra of atomic and molecular oxygen 243
Organic liquid
VUV light-induced electron emission from organic liquids 417
Overlayer
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429
Oxygen
Coherent excitation of vibrational wave functions observed in core hole decay spectra of O_2, N_2 and CO 261
Photoexcited *K* Auger spectra of atomic and molecular oxygen 243

PES
Ethenethiol and 1-propene-1-thiol: a photoelectron spectroscopic study 173
He I photoelectron spectra and π-electronic structure of 1,3,2,4-benzodithiadiazine and 5,6,7,8-tetrafluoro-1,3,2,4-benzodithiadiazine, formally antiaromatic 12π-electron compounds 489
He I photoelectron spectroscopic studies of the electronic structure in some forked conjugated systems. Experimental and theoretical studies of the molecular orbital character of the compounds 493
The importance of ligand-field splitting in the interpretation of the HBr Br3d pre-edge photoabsorption (EELS) spectrum, the Br3d photoelectron spectrum, and the *MVV* Auger spectrum 299
Perfluoro effect
He I photoelectron spectra and π-electronic structure of 1,3,2,4-benzodithiadiazine and 5,6,7,8-tetrafluoro-1,3,2,4-benzodithiadiazine, formally antiaromatic 12π-electron compounds 489
Phonon
Angular distribution of photon-induced $M_{2,3}$–N_1N_1 Auger electrons in atomic calcium 363
Photoreduction
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
Propenethiol
Ethenethiol and 1-propene-1-thiol: a photoelectron spectroscopic study 173

Quantum yield
VUV light-induced electron emission from organic liquids 417

Rare gas
Auger spectroscopy at low kinetic energies 341

REELS
On the deposition of thin TiO_2 films from Langmuir Blodgett film precursors. An electron spectroscopy study 163
Reduction
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
Reference
Yields, sensitivities and natural line shapes of high-energy Auger lines: Ta, W, Pt, Au, Pb and Bi 511
Resonance
Photoexcited *K* Auger spectra of atomic and molecular oxygen 243
RPAE
The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141

SAES
The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141
Satellite
Angular distribution of photon-induced $M_{2,3}$–N_1N_1 Auger electrons in atomic calcium 363
Auger spectroscopy at low kinetic energies 341
The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 257
SCF
Theory assisted interpretation of copper phthalocyanine core levels XPS spectra 189
SCS
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
Sensitivity
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
Shake-off
The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 275
Shake-up
The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 275
SIMS
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
Signal to noise ratio
Optimisation and specification of Auger electron spectrometers for signal-to-noise ratio performance 151
Silicon nitride
Surface vibrations of silicon nitride: inelastic neutron scattering study and computer modeling 133
Silicon tetrafluoride
The importance of electron correlation satellites in the silicon 2p Auger spectrum for the SiF_4 molecule 275
Solid surface
XPS determination of the isoelectric point of solid surfaces: possible improvements to the method of Simmons and Beard R1
Standard
Yields, sensitivities and natural line shapes of high-energy Auger lines: Ta, W, Pt, Au, Pb and Bi 511
Support
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429
Synchrotron
Auger electron–photoion coincidence measurements of atoms and molecules using X-ray synchrotron radiation 373

TEELS
An angular resolved electron energy loss investigation of highly oriented pyrolitic graphite electronic structure 479
TEY
Experimental estimate of absorption length and total electron yield (TEY) probing depth in dysprosium 181
Titanium oxide
On the deposition of thin TiO_2 films from Langmuir Blodgett film precursors. An electron spectroscopy study 163
TOF
Auger electron–photoion coincidence measurements of atoms and molecules using X-ray synchrotron radiation 373
Total electron yield
Experimental estimate of absorption length and total electron yield (TEY) probing depth in dysprosium 181
Transfer excitation
Zero-degree Auger spectroscopy in energetic, highly charged ion–atom collisions 309
Transfer loss
Zero-degree Auger spectroscopy in energetic, highly charged ion–atom collisions 309
Transit time
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
Transition metal
X-ray absorption and dichroism of transition metals and their compounds 529

Transition metal compound
X-ray absorption and dichroism of transition metals and their compounds 529

VLE
VUV light-induced electron emission from organic liquids 417

VUV
VUV light-induced electron emission from organic liquids 417

XAS
Experimental estimate of absorption length and total electron yield (TEY) probing depth in dysprosium 181
X-ray absorption and dichroism of transition metals and their compounds 529

XPS
Accurate measurement of Mg and Al $K\alpha_{1,2}$ X-ray energy profiles 463
Design study of a double pass hemispherical electron energy analyser with multichannel detection 211
Kinetics of photoreduction of Fe(III) in solid solution $K_3(Fe,M)(CN)_6$ (where M is Cr, Co) during XPS measurement 401
On the deposition of thin TiO_2 films from Langmuir Blodgett film precursors. An electron spectroscopy study 163
Study of SiO_2/Si interface states in MOS devices by surface charge spectroscopy. Application to rapid thermal nitridation of silicon 409
The configuration interaction (CI) satellites in the 4s–4p photoelectron spectra of Cs metal and Cs overlayers 141
The determination of depth profiles from angle-dependent XPS using maximum entropy data analysis 439
Theory assisted interpretation of copper phthalocyanine core levels XPS spectra 189
X-ray absorption and dichroism of transition metals and their compounds 529
XPS determination of the isoelectric point of solid surfaces: possible improvements to the method of Simmons and Beard R1
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429

Zirconia
XPS quantitative evaluation of the overlayer/support intensity ratio in particulate systems 429
